PH SUPERFLUSH
INSTALLATION AND MAINTENANCE INSTRUCTIONS

THE FOLLOWING ARE CAUTIONARY STATEMENTS THAT MUST BE READ AND FOLLOWED DURING BOTH INSTALLATION AND OPERATION

**WARNING:** Raritan Engineering Company, Inc. recommends that a qualified person install this product. Equipment damage, injury to personnel or death could result from improper installation. Raritan Engineering Company, Inc. accepts no responsibility or liability for damage to equipment, or injury or death to personnel, that may result from improper installation or operation of this product.

**WARNING:** Hazard of Flooding - Any installation made below the waterline must have vented loops positioned properly and all hose connections should be double-clamped. Both intake and discharge seacocks should always be in the closed position when the toilet is not in use. Failure to do so may result in flooding, property damage and loss of life.

The power of the legendary PHIIPUMP on a more universal and sleek base.

The PH Superflush combines the efficient flushing action of the PHII with a more "universal base" for easier upgrades from competitive models. The PH Superflush also includes a slow close seat.

All models are suitable for use in conjunction with Raritan’s Electroscan® and Purasan® Waste Treatment Systems. Both are U.S. Coast Guard Certified Type I flow-thru Marine Sanitation Device (MSD) and/or holding tanks.
OPERATION

WARNING: DO NOT adjust valve handle (1209BW) while toilet is operating.

1. With valve handle in the "FLUSH" position pumping the handle will draw water in and discharge the bowl contents.
2. With valve handle in the "DRY" position pumping the handle will only discharge the bowl contents while drawing air in through the air valve assembly to prevent a build-up of pressure.

- We recommend single ply toilet paper.
- Water should appear in the bowl within ten seconds. If not, see troubleshooting section.
- Hard objects or stringy substances (paper towels, feminine hygiene products, filter cigarettes, etc.) must not be thrown into the toilet as they will cause damage.
- Always shut off seacock(s) before leaving the boat unattended.

Cleaning Instructions

IMPORTANT: Do not use cleaners that contain ammonia, ethyl acetate, phosphoric acid or concentrated chlorine bleach. These may cause damage to the toilet.

Using C.P. a bio-enzymatic toilet bowl cleaner (1PCP22) will keep the bowl clean and fresh smelling.

Recommend Visual Inspection

✓ For leaks at toilet and hose connections
✓ Hose clamps
✓ Condition of hoses
✓ Seacocks
✓ Condition of wires and connections
✓ In-Line Strainer (if you have one)

MAINTENANCE

Super Lube\textsuperscript{®} (#SL1CC) applied to the piston rod will prolong the life of the Piston Shaft Seal. This should be done every spring and fall or more regularly if the head is used frequently. Applying Super Lube to all moving parts is also recommended.

Installation of a Knocks Out Odor Kit (#KO2) will reduce the "rotten egg" smell associated with using salt or brackish water to flush the toilet.
Before attempting repairs, refer to the Troubleshooting section of this manual.

**WINTERIZING**

Improper winter lay up is a major cause of marine toilet failures.

**Parts Required**

- 3/4" I.D. intake hose approximately 3 feet long.
- 1 1/2" I.D. discharge hose approximately 3 feet long.
- Two buckets
- Nontoxic antifreeze approximately 1 quart

1. Close the intake and discharge seacock. Disconnect and drain the intake and discharge hoses.
2. Connect short hoses to toilet’s intake and discharge.
3. Place one bucket under short hose on discharge.
4. Pour nontoxic antifreeze in other bucket.
5. Place hose connected to intake into bucket with antifreeze.
6. Flush toilet until antifreeze begins to be discharged from toilet.
7. Antifreeze should remain in the toilet until recommissioning. This will protect both intake and discharge sides of the pump. Pouring antifreeze into the bowl will only protect the discharge.

**NOTE:** Holding tanks, seacocks and treatment systems need to be independently winterized, stored and recommissioned (see manufacturer’s instructions).

**RECOMMISSIONING**

1. Lubricate piston rod with Super Lube®.
2. Using the buckets, hoses and a gallon (3.8 liters) of clean water, flush the antifreeze out of the toilet. Dispose of antifreeze properly, in accordance with local and federal regulations.
3. Reconnect the hoses and open both seacocks.
4. Check all connections for leaks with several test flushes.

**Inlet Valve/ Handle Orientation and Repair**

**Tools you will need:** Channel type pliers, Flat-blade (med) screwdriver

Gaining access to the inlet valve

To clean out debris or dismantle the valve it is necessary to access the inlet valve spring (part# LWS) and ball (#1201).

It is only necessary to unscrew the inlet valve cap (part #1204B) approximately 5 revolutions with channel type pliers. **Note:** It is not necessary to remove or loosen any other part.

Then by grasping the 1209BW handle and gently lifting upwards, the entire assembly (down to part #1203BW) can be removed.

Clean out any debris in this area.

Replace gasket (part#1202) if necessary and apply a small amount of Super Lube (#SL1CC) to the O-ring area of the 1203BW.

Reassemble in the reverse order making sure that the alignment post of the 1200CW housing protrudes **between** the two limiting stops in the underside of the 1209BW. This allows for the proper position of the inlet valve.

If installed properly this creates a maximum of a 1/4 turn from "Dry" to "Flush" **not** 3/4 turn.

**Note:** Do not overtighten #1204B as gasket #1202 will displace.

**FIG 3**

**NOTE:** Before reinstalling 1209BW valve handle, be sure points "A" and "B" on the inlet valve body (#1203BW) are positioned as shown by the double arrow.

POINT "A"

POINT "B"
INSTALLATION

Raritan PH SuperFlush Marine Toilet Front View, Side View and Footprint

Tools Required
- 5/16" nut driver
- Wrench or screw driver
- Bit for drilling mounting surface
- Hose cutters
- Tape measure

Additional Parts Required
- Four stainless steel mounting bolts or lag screws (minimum 1/4" [6mm]) and washers
- 1 1/2" I.D. discharge hose
- 3/4" I.D. reinforced intake hose
- Hose clamps (two for each connection below waterline)

MOUNTING TOILET

Mounting surface must be flat and solid.
1. Install seat on toilet.
2. Place toilet where it will be located.
   Make sure there is room to route hoses.
   Make sure seat will open properly.
3. Mark location of toilet base mounting holes on mounting surface.
4. Drill holes for toilet mounting bolts/screws.
5. Secure toilet to surface.

NOTE:
1. THE SEAT WILL OPEN WITHIN THE DEPTH OF THE BOWL (D), HOWEVER, IT MAY BE DESIRABLE TO INCREASE THIS ANGLE BY ALLOWING MORE ROOM AT THE BACK OF THE BOWL FOR THE SEAT TO OPEN.
2. MARINE STYLE BOWL, D DIMENSION IS 17 3/8 [442MM] WITH HANDLE EXTENDED.
3. DIMENSIONS ARE FOR REFERENCE AS VITREOUS CHINA DIMENSIONS MAY VARY +/- 5%.
PLUMBING

WARNING: Hazard of Flooding

Toilets mounted at or below the waterline must have a vented loop installed in the discharge line. The top of the vented loop must be a minimum of 4” (10 cm.) above the waterline at the boat’s greatest angle of heel (see vented loop manufacturer’s instructions).

Double clamp all below-waterline connections.

IMPORTANT

• Fittings and 90° bends should be kept to a minimum.
• In-Line Strainer may be installed. This will prevent clogs.
• Discharging untreated sewage is forbidden in all U.S. waters within the three-mile limit.
• Thru-hull fittings and seacocks must be installed where they are easily accessible.
• Use only quality reinforced hoses such as Raritan Saniflex (SFH)
• Secure all hoses properly.

1. Route discharge hose above discharge outlet with a vented loop. This will enable the toilet to discharge more efficiently and will help to prevent backflow.

2. An In-Line Strainer (#163000) is recommended. This will help minimize odors and help prevent clogging.

3. Intake and discharge thru-hull fittings should be located far enough apart to prevent discharge water from being drawn through the intake.

4. The optional Raritan Knocks Out Odors Kit (#KO2) enables the use of Cleans Potties (#1PCP22). Raritan Cleans Potties deodorizes the bowl and lubricates internal parts.

5. Flush and check for leaks.
Troubleshooting

Water not being drawn in

- **Check Ball Stuck**
  Shutoff seacock and remove intake hose
  Using an eraser end of pencil be sure check ball is moving freely
- **Debris lodged in intake valve body**
  Check and clean valve body
- **Piston O-ring worn**
  Replace Piston O-ring
- **Inlet valve in wrong position**
  Inlet valve should only rotate 1/4 turn

Leak around piston shaft

- **Cartridge seal worn**
  Replace cartridge seal
  Inspect and replace piston shaft if scored

Odor comes from head area when flushed

- **Marine vegetation lodged in bowl**
  Remove bowl and attach pressure water at spud assy.
  Install strainer in intake line
- **Intake water is foul (most common in salt and brackish)**
  Install Knocks Out Odors Kit (KO2) to help deodorize intake water
- **Back pressure from holding tank**
  Tank full or vent clogged, inspect and clean
- **Permeated discharge hose**
  Rub with warm damp rag if smell transfers to rag
  Replace hose (Saniflex (SFH) recommended).

Water rises in bowl

- **Vented loop(s) not breaking siphon**
  Close discharge seacock, then intake seacock to determine which is causing the problem.
  Clean or replace vented loop(s) parts.
- **Joker valve worn**
  Inspect, clean or replace as needed

Water accumulates in the bowl too fast

- **Flapper valve not seated properly**
  Close intake valve and pump dry - clean or replace flapper valve as necessary
- **Joker valve not closing or opening properly**
  Clog or restriction in discharge line
  Close intake valve and pump dry - clean or replace joker valve as necessary

Not enough water to rinse bowl

- **Intake valve positioned improperly**
  Be sure inlet knob only turns 1/4 see fig. #3
- **Debris around intake or discharge check balls**
  Remove check balls, clean and replace as necessary
- **Scored pump housing or worn piston "O" ring**
  Inspect inside of housing replace "O" ring and housing as necessary
- **Intake line or strainer clogged**
  Clean line and strainer

LIMITED WARRANTY

Raritan Engineering Company warrants to the original purchaser that this product is free of defects in materials or workmanship for a period of one year from the product’s date of purchase. Should this product prove defective by reason of improper workmanship and/or materials within the warranty period, Raritan shall, at its sole option, repair or replace the product.

1. TO OBTAIN WARRANTY SERVICE, Consumer must deliver the product prepaid, together with a detailed description of the problem, to Raritan at 530 Orange St., Millville, N.J. 08332, or 3101 SW 2nd Ave. Ft. Lauderdale, FL 33315. When requesting warranty service, purchaser must present a sales slip or other document which establishes proof of purchase. THE RETURN OF THE OWNER REGISTRATION CARD IS NOT A CONDITION PRECEDENT OF WARRANTY COVERAGE. However, please complete and return the owner Registration Card so that Raritan can contact you should a question of safety arise which could affect you.

2. THIS WARRANTY DOES NOT COVER defects caused by modifications, alterations, repairs or service of this product by anyone other than Raritan; defects in materials or workmanship supplied by others in the process of installation of this product; defects caused by installation of this product other than in accordance with the manufacturer’s recommended installation instructions or standard industry procedures; physical abuse to, or misuse of, this product. This warranty also does not cover damages to equipment caused by fire, flood, external water, excessive corrosion or Act of God.

3. ANY EXPRESS WARRANTY NOT PROVIDED HEREIN, AND ANY REMEDY FOR BREACH OF CONTRACT WHICH BUT FOR THIS PROVISION MIGHT ARISE BY IMPLICATION OR OPERATION OF LAW, IS HEREBY EXCLUDED AND DISCLAIMED. ALL IMPLIED WARRANTIES SUCH AS THOSE OF MERCHANTABILITY AND OF FITNESS FOR A PARTICULAR PURPOSE, IF APPLICABLE, AS WELL AS ANY IMPLIED WARRANTIES WHICH MIGHT ARISE BY IMPLICATION OF LAW, ARE EXPRESSLY LIMITED TO A TERM OF ONE YEAR. SOME STATES DO NOT ALLOW LIMITATIONS ON HOW LONG A LIMITED WARRANTY LASTS, SO THE ABOVE LIMITATION MAY NOT APPLY TO YOU.

4. UNDER NO CIRCUMSTANCES SHALL RARITAN BE LIABLE TO PURCHASER OR ANY OTHER PERSONS FOR ANY SPECIAL OR CONSEQUENTIAL DAMAGES, WHETHER ARISING OUT OF BREACH OF WARRANTY, BREACH OF CONTRACT, OR OTHERWISE. SOME STATES DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THE ABOVE LIMITATION OR EXCLUSION MAY NOT APPLY TO YOU.

5. No other person or entity is authorized to make any express warranty, promise or affirmation of fact or to assume any other liability on behalf of Raritan in connection with its products except as specifically set forth in this warranty.

6. This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.

Units requiring extensive repairs may be returned to the Millville, NJ or Fort Lauderdale, FL office for overhaul. Instructions, including name, address and phone number MUST accompany returned units to ensure proper handling.
